BRING MOBILE LEARNING INTO YOUR CLASSROOM

X-kit Achieve Mobile is our digital learning, revision and practice tool that allows learners to prepare for tests and exams.

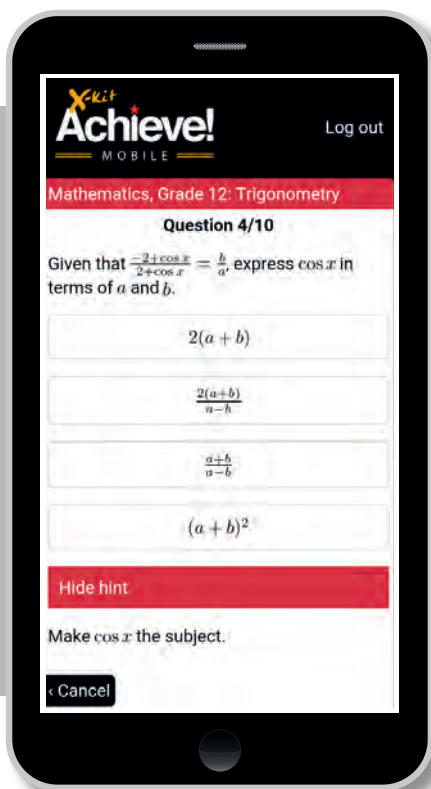

Help learners to revise content and prepare for exams

Pearson understands that most learners today are immersed in the digital environment, so we developed a learning tool that meets them where they are most comfortable... **online**.

X-kit Achieve Mobile helps learners to prepare for tests and exams on their cellphones. It provides levelled quizzes, helpful hints and worked solutions, as well as theory for every topic. You can use **X-kit Achieve Mobile** in your classroom to engage learners and help them improve their results.

How learners use X-kit Achieve Mobile

- ★ Practise skills at their own pace.
- ★ Complete quizzes with helpful hints and worked solutions.
- ★ Access essential theory.
- ★ Collect badges for their achievements.
- ★ Join the leaderboard to compete against their peers.

How teachers use X-kit Achieve Mobile

- ★ Provide learners with additional support and exam preparation.
- ★ Assign quizzes for homework.
- ★ View learner scores from automatically marked quizzes.
- ★ Receive reports and view overall progress of the class.
- ★ Use reports to inform classroom teaching.

“ X-kit Achieve Mobile has given more of my learners the confidence to start engaging in classroom discussions about Mathematics content. ”

Bring the benefits of mobile learning into your classroom

X-kit Achieve Mobile for schools makes it easy and cost effective for teachers to bring the benefits of mobile learning into the classroom with these features.

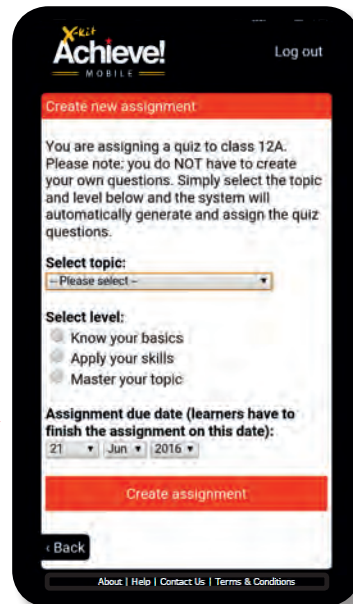

Teacher dashboard

Teachers will get access to all content and features, as well as a useful teacher dashboard from which to manage their classes, assign quizzes and view results.

Manage and assign quizzes

Assign quizzes for homework and provide learners with additional support and exam preparation. Quizzes are automatically marked and reports can be used as evidence of formative assessment.

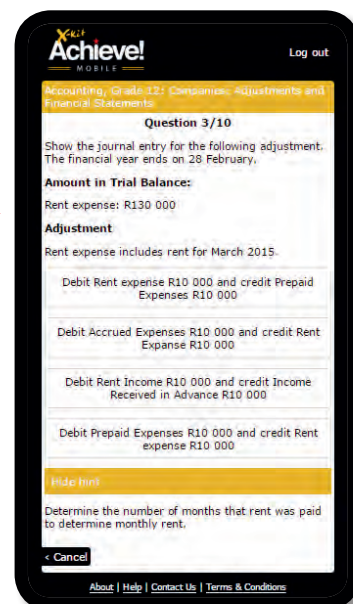

Levelled quizzes

Each topic has three levels learners need to progress through:

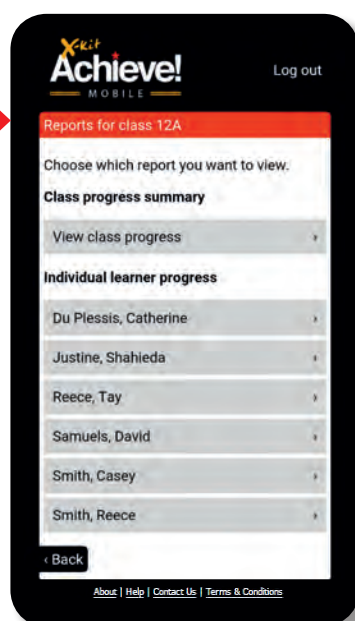

- Know your basics
- Apply your skills
- Master your topic.

Each level consists of quizzes structured according to cognitive levels, as per requirements in **CAPS**.

View reports

Teachers can view individual learner scores and overall progress of the class and use the reports to inform classroom teaching.
